

ACTIVATE 44

Prescription Agronomics Box 366 Ipswich SD 57451

Visit us on the web at www.prescriptionag.com

Why Activate 44?

- Reduces bicarbonates in water that interfere with mineral metabolism.
- Increases mineral metabolism.
- Keeps water lines free of contaminants such as sludge, bacteria, and drug residues.
- Lowers the water pH, thereby stabilizing the acid buffering components found in higher protein feeds that influence bacterial reproduction in livestock.
- Lowers and stabilizes water pH enhancing microbial activity in waste water.
- Activate 44 lowers and maintains water pH as one of the keys to effectively eliminate the reproduction of bacterial pathogens.
- Reduces volatile gas compounds above waste storage in confinements, improving air quality.
- Improves water intake and retention for easier protein digestion and energy.
